1. Introduction

This group coursework of Introduction to Information Systems covers 60% of the overall module grades. This report offers an explanation of an e-commerce website aimed at building an engaging and user-friendly web presence for a store that sells various grocery items. This project is to create visually appealing website that effectively meets the needs of the targeted customers/users by using HTML5, CSS3, and JavaScript. This project helps us to showcase our web development skills to develop user-friendly websites, and understand website technologies. In our project, we have created a grocery store website named Kirana Station which includes five main web pages [Home, About Us, Shop, Blog, Research]. The project helped us understand the fundamental web technologies and learned how HTML5 structures content, CSS3 styles and layouts, and JavaScript adds interactivity and dynamic behavior to web pages.

The goal and objective of this project is to develop skills in HTML5, CSS3, and JavaScript through the development of a visually appealing website. Appropriate tools and technologies were used to design a website. The project also helps us understand the website structure and navigating principles as well as acknowledge the Internet's impact in our daily lives and understanding of the basic Internet technologies. The main objective of this project is to make the website accessible and well-designed for users.

HTML stands for Hyper Text Markup Language which creates a structure for web pages and web applications. HTML5 is the newest version of Hypertext Markup language. The first draft of this version was announced in January 2008. There are two major organizations one is W3C (World Wide Web Consortium), and another one is WHATWG (Web Hypertext Application Technology Working Group) which are involved in the development of HTML 5 version, and still, it is under development. (Jaiswal, What is HTML? Definition of Hypertext Markup Language, 2011)

CSS stands for Cascading style sheets. It describes to the user how to display HTML elements on the screen in a proper format. CSS is the language that is used to style HTML documents. There are three types of CSS: Inline, Internal and External. CSS3 is the latest version of CSS that makes the Web Pages more attractive and takes less time to create a page. (Jaiswal, What is CSS, 2011)

JavaScript (JS) is a light-weight object-oriented programming language which is used by several websites for scripting the webpages. It is an interpreted, full-fledged programming language that enables dynamic interactivity on websites when applied to an HTML document. (Jaiswal, Learn JavaScript Tutorial, 2011)

The goals of the given report can be achieved by creating a user-friendly, visually appealing website with our capabilities using HTML5, CSS3, and JavaScript. Through this project, we will have expertise in web development and enhance our coding skills in HTML5, CSS3 and JavaScript and get familiar with web development process.

2. Discussion and Analysis

2.1 Tools Used

2.1.1 Visual Studio Code

Visual Studio Code, also known as VS code, is an adaptable code editor designed by Microsoft. VS code is filled with a rich feature set which makes users easy to code. It provides tools and workability which makes it very easy to develop a website. It is a powerful code editor that is available in all macOS, Windows, and Linux. Its key features are:

- Lightweight and Fast
- Intelligent code editing
- Easy Debugging
- Multiple language Support
- Syntax Highlights
- Keyboard shortcuts
- Open Source

2.1.2 Balsamiq Wireframes

Balsamiq is a popular wireframing application that allows developers, designers, and product managers to create low-fidelity models of user interfaces. We used Balsamiq to create the wireframe for our websites. It is very beginner-friendly and can be used on any platform which includes Windows, Mac, and Linux. Balsamiq provides every tool and icon to create a pro wireframe for websites. Some basic features of Balsamiq contain.

- Sketch-like style
- Export options
- Pre-built UI Components
- Beginner friendly

2.1.3 Figma

Figma is a versatile tool widely used for designing, collaborations, and prototyping.

Figma is the most popular tool for designing UI/UX for any website. We have used Figma on the Shop page for an excellent wireframe design. It is a user-friendly tool and can be used in macOS and Windows even for an offline works. Its key features are:

- Design easily
- Auto-Layout
- Version-History
- Cloud-Based

3. Web Pages

3.1 Home Page

This page represents a comprehensive webpage for "Kirana Station," an online grocery store. It includes the basic information about the e-commerce website. Its layout is structured with a header, main body, and footer sections. The header contains the logo, navigation links, search bar, and icons for account management. Within the main body, there is a slider showcasing store highlights, a feature section emphasizing organic products and fast delivery, exclusive deals, categorized product listings, a description of the store's mission, FAQs, and a call-to-action for membership. The footer includes company details, quick links, contact information, accepted payment methods, and a Google Maps embed. JavaScript functions enhance user experience by enabling automatic sliders, countdown timers, favorites and cart actions, product card scrolling, and FAQ answer toggling.

3.1.1 Wireframe of Home Page

3.2 Product/Shop Page

The shop/product page features descriptions of various products, including details like the product name, price, quantity, and any discounts. The page header contains navigation links to different sections such as Home, Shop, Research, Blog, About Us, and others. On the right side of the page, there is a large container prominently showcasing a selected product. Each product listing includes an enticing description along with pricing information and an option to select the desired quantity and add it to the shopping cart. The page categorizes products into sections like Fruits, Vegetables, Dairy, Snacks, Beverages, Spices & Oils, Protein sources, and Grains, allowing customers to easily explore different product categories. At the bottom, a horizontal carousel displays small icons with buttons representing various products, giving customers a glimpse of the diverse product range available on the website. Clicking one of these buttons rotates a wheel in the top-left corner of the page, displaying the selected product. Additionally, a smaller container on the bottom-left provides category options, allowing users to navigate and switch between different product categories seamlessly.

3.2.1 Wireframe for Product Page

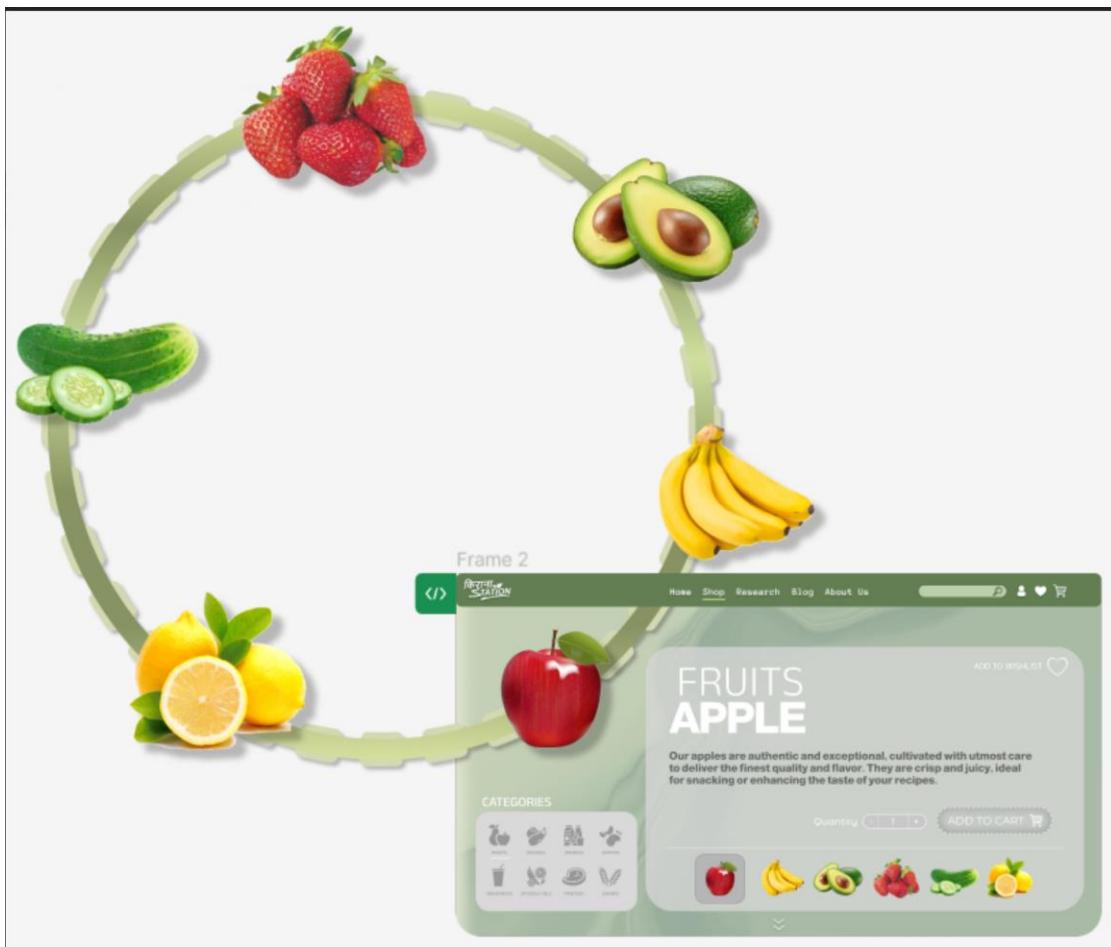

Figure 10 : Wireframe for product page

3.2.2 Output of Product Page

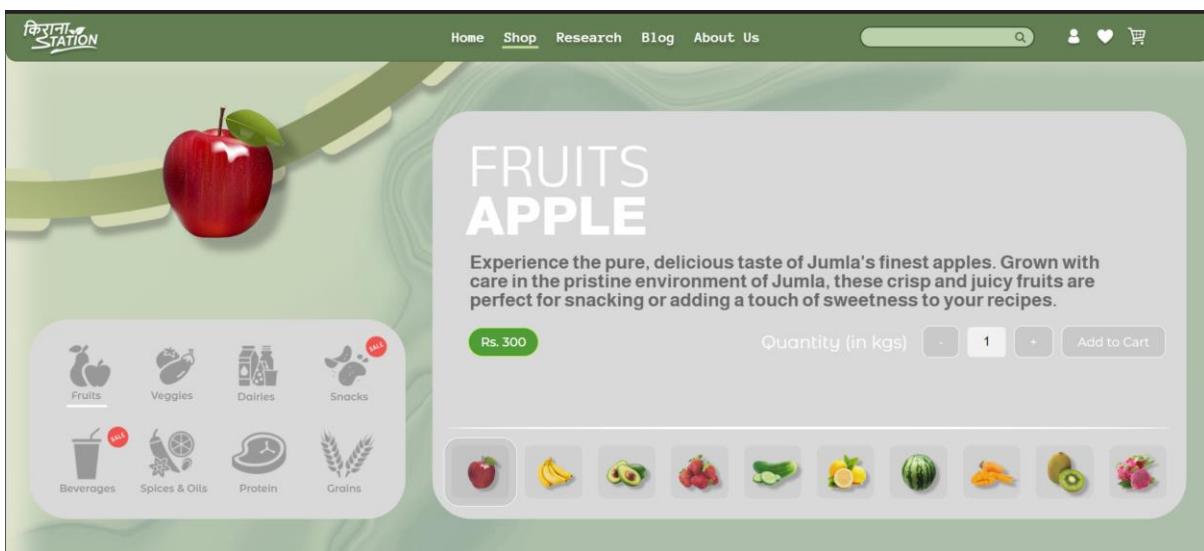

Figure 11: output of product page

3.3 Research Page

The research page lays out a detailed comparison of various aspects between Kirana Station and other websites like Daraz, Amazon, Yokolocal, and Jeevee. Each section compares different features, such as color schemes, navigation bars, footer layouts, and more. It is structured well with clear headings, image containers, difference descriptions, and comparison tables for easy understanding. Additionally, the header and footer sections provide navigation links, social media icons, contact details, and payment methods, enhancing user interaction and accessibility.

3.3.1 Wireframe for Research Page

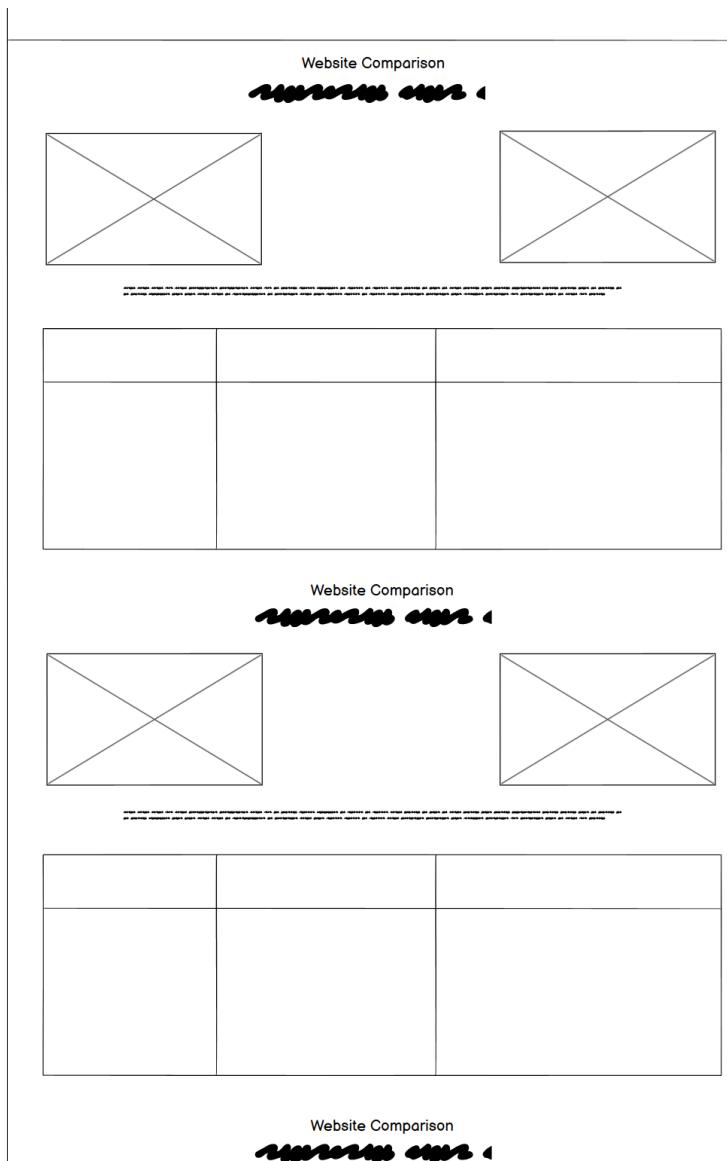

Figure 12: Wireframe of research page

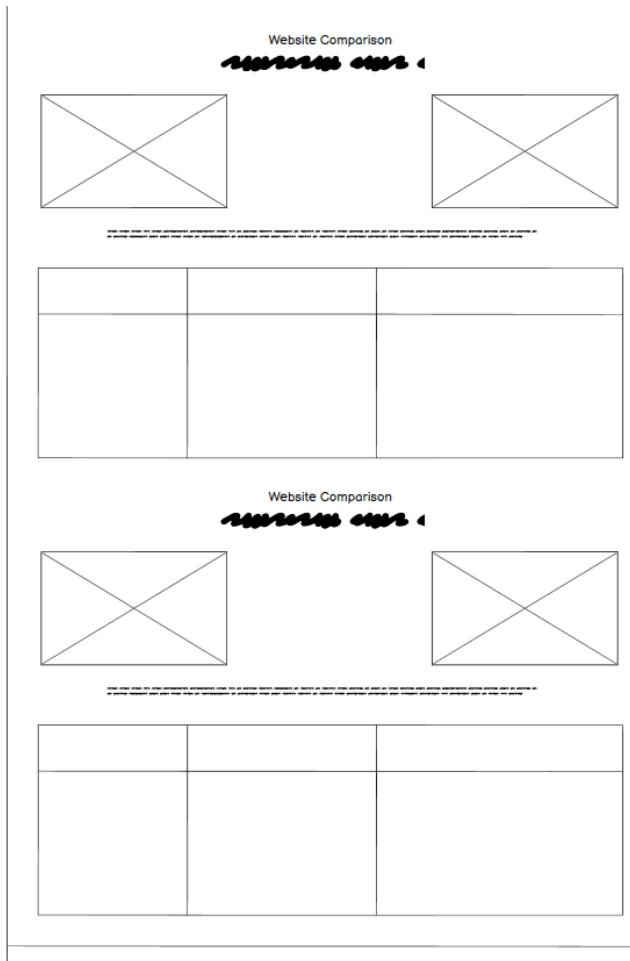

Figure 13: Wireframe of research contd.

3.3.2 Output of Research Page

The screenshot shows a web page titled "GET TO KNOW" with the subtitle "how we built our website and our inspirations". Below this is a section titled "WEBSITE COMPARISON" with the heading "Comparing With Daraz Website". It displays two side-by-side screenshots of e-commerce websites: Kirana Station (left) and Daraz (right). Both screenshots show "FLASH SALES" sections with various products like oil, mutton, watermelon, rice, and biscuits. A caption below the screenshots states: "Daraz and Kirana Station are two different websites. We will compare them based on several key aspects such as:"

Feature	Kirana Station	Daraz
Color scheme	Orange theme, White background and Black text	Green theme, White background and Black text
Slideable Product Carts	YES	NO

Figure 14: output of research

WEBSITE COMPARISON
Comparing With Amazon Website

Amazon and Kirana Station are two different websites. In this research page, we will compare their footer in various aspects such as:

Feature	Kirana Station	Amazon
Logo	on top of footer	bottom of footer
Contact Number	YES	NO
Location	Displayed with Google Maps	No location displayed
Color scheme	Green background with black text	Black background with white text
Payment Methods	Displayed various forms of payments	No payment form included

Figure 15: output of research page cont.

Comparing With YokoloLocal Website

YokoloLocal and Kirana Station are two different websites. In this research page, we will compare the 'Meet Our Team' in several factors such as:

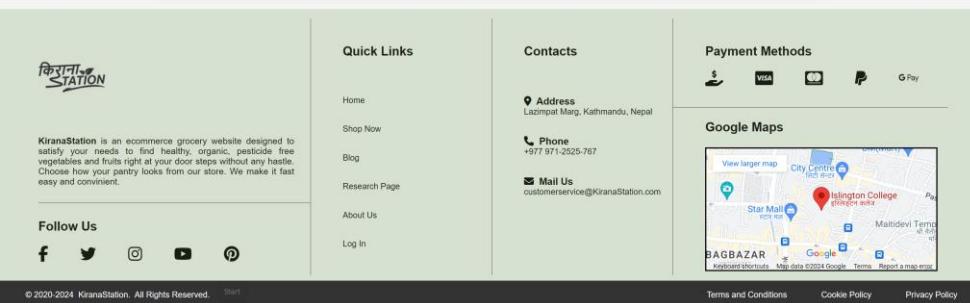

Feature	Kirana Station	YokoloLocal
Social Media links	YES	NO
Heading	Meet Our Team in black text	No heading
Photos	YES	YES
Introduction of team leader	NO	YES

WEBSITE COMPARISON
Comparing With Jeevee

Figure 16: output of research page cont.

Color scheme	Green background with green theme	White background with orange theme
Grocery Items	grocery items are clearly visible with icons	products are visible with price range
Add to cart	add to cart option available right next to product	no add to cart option visible
Language Icon	NO	YES
Description of product	YES	NO

3.4 Blog Page

The blog page offers a diverse range of articles centered around the grocery industry and emerging grocery technology trends. It covers various topics like industry insights, product highlights, healthy living tips, sustainable practices, and technological innovations impacting the sector. Articles explore both the advantages and potential drawbacks of new grocery technologies to provide a balanced perspective.

Each post features an engaging title, concise summary, and visuals to draw readers in. The page is organized into categories for easy navigation, allowing visitors to read full articles of interest. It also includes interactive elements like comment sections and social sharing buttons to encourage engagement.

Overall, the blog functions as an informative resource, keeping readers updated on the latest grocery trends, technological advancements, and their implications through well-researched and thought-provoking content.

3.4.1 Wireframe for Blog Page

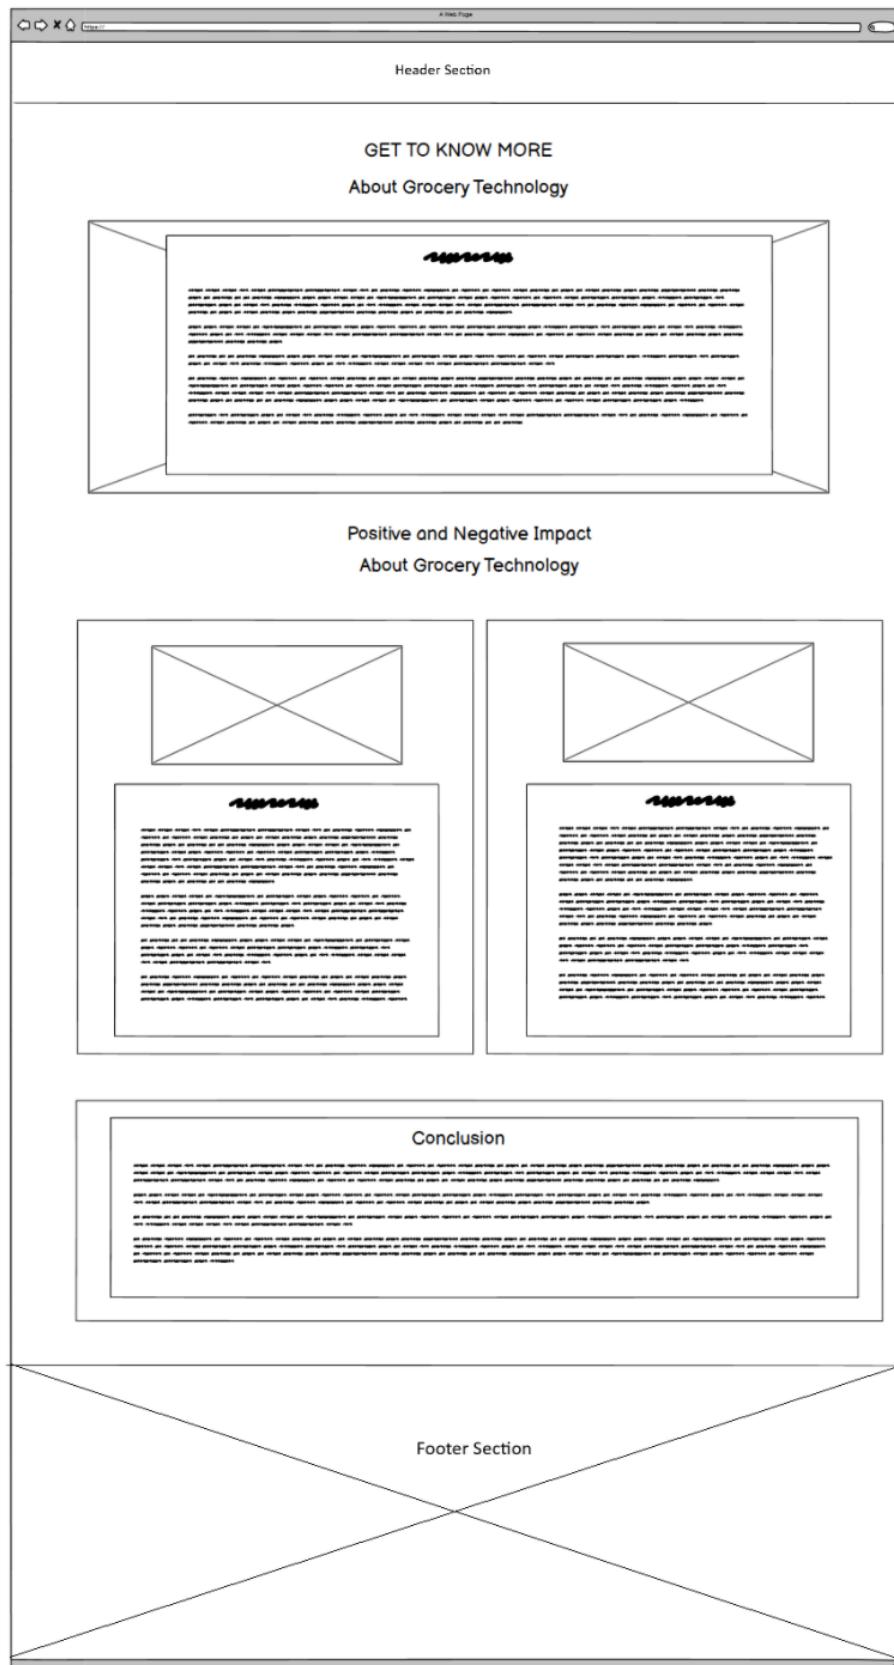

Figure 18: wireframe for blog page

3.4.2 Output of Blog Page

The screenshot shows a blog post titled "About Grocery Technology". At the top, there's a navigation bar with links for Home, Shop, Research, Blog, and About Us. Below the navigation is a search bar and user icons. A green banner at the top says "GET TO KNOW MORE". The main title "About Grocery Technology" is in bold green text. Below the title is a section titled "Grocery Technology" with a detailed description. The background of the main content area features a blurred image of various fruits and vegetables.

Grocery Technology

Grocery technology includes a range of tools and creations with the goal of improving and streamlining the grocery shopping experience for consumers as well as retailers. Grocery technology have had an immensely beneficial power, making the shopping experience for consumers and boosting operational efficiency for companies.

Grocery technology is transforming the way consumers shop and grocery companies operate. In grocery technology, customers can browse through the website to order any product and also schedule deliveries and pickups. Grocery technology is more efficient and sustainable.

POSITIVE AND NEGATIVE IMPACT

About Grocery Technology

Figure 19: output of blog page

This screenshot shows a blog post titled "About Grocery Technology" focusing on the "Positive And Negative Impact". The top navigation and banner are identical to Figure 19. The main title is "About Grocery Technology". Below it is a section titled "POSITIVE AND NEGATIVE IMPACT".

Positive Impact Of Technology In Grocery

The introduction of technology in the grocery business drastically enhanced the shopping experience, efficiency, and convenience for consumers as well as businesses. Grocers may now maintain abundant stock levels with innovative inventory management systems and data analytics, decreasing waste and increasing product availability. Customers can purchase from the comfort of their own homes, schedule deliveries, and take advantage of tailored services through e-commerce and mobile applications. Furthermore, advancements such as self-checkout systems, automated warehouses, and AI-driven assistance for customers have simplified

Negative Impact Of Technology In Grocery

While technology has revolutionized the grocery industry, it also brings several negative impacts. The increased reliance on automation and digital systems can lead to job displacement, reducing employment opportunities for cashiers, stock clerks, and other grocery store workers. Small, independent grocers may struggle to compete with larger chains that can afford the latest technological advancements, potentially leading to reduced market diversity. Additionally, the collection and use of consumer data for personalized marketing and inventory management raise privacy concerns, as customers may not always be aware of how their information is being used. Lastly, the digital divide means that some

Figure 20: output of blog page

The screenshot shows the KiranaStation website's blog page. At the top, there is a navigation bar with links for Home, Shop, Research, Blog (which is underlined to indicate it is the current page), and About Us. There is also a search bar and user icons for login and cart.

The main content area features a box titled "Conclusion". Inside the box, the text reads:

In conclusion, while grocery technology offers various benefits such as convenience, efficiency, and improved customer service, it also offers issues such as work displacement, privacy concerns, and higher levels of inequality. As result, individuals in the grocery industry must carefully analyze and manage these issues to ensure that technological improvements benefit both customers and businesses while limiting negative social consequences.

The footer of the page contains several sections:

- Quick Links:** Home, Shop Now, Blog, Research Page, About Us, Log In.
- Contacts:** Address (Lazimpat Marg, Kathmandu, Nepal), Phone (+977 971-2525-767), Mail Us (customerservice@KiranaStation.com).
- Payment Methods:** Icons for \$ (Dollar), VISA, MasterCard, American Express, and G Pay.
- Google Maps:** A map showing the location of KiranaStation in Kathmandu, Nepal, with markers for City Centre, Star Mall, BAGBAZAR, and IELTS. It includes a legend for Google Map icons and copyright information.

At the very bottom, there is a footer bar with links for Terms and Conditions, Cookie Policy, and Privacy Policy.

Figure 21: output of blog page contd.

3.5 About Us

About Us Page

The "About Us" page commences with a succinct description of the online grocery store, prominently showcasing its slogan: "Provide Fresh, Organic Food for Everyone." This section establishes the core ethos and introduces the company's mission to deliver high-quality, organic produce to its valued customers.

Proceeding further, the page delves into the store's journey, dedicating a few informative paragraphs to "Our Journey from Farm to Table." This section aims to foster transparency by elucidating the process of sourcing fresh produce directly from farms and delivering it promptly to customers' doorsteps, thereby ensuring maximum freshness and quality.

Subsequently, the "Meet Our Team" section offers an overview of the talented individuals driving the company's operations. Each team member is represented by a profile image, and clicking on an individual's profile reveals more comprehensive information, including their qualifications, educational background, computational proficiency, and any notable volunteer work or achievements. Furthermore, visitors can access each team member's CV, showcasing their professional experience and expertise in detail.

To cultivate trust and credibility, the page features a "Testimonials" section, which highlights positive feedback from customers who have had early access to the grocery website. These testimonials, accompanied by customer names and profile pictures, serve as social proof, and encourage potential customers to explore the service.

Finally, the page includes a "Membership Form" section, inviting visitors to become members of the online grocery store. This section outlines the benefits of membership, such as a 5% additional discount on any ongoing offers or deals and a 10% lifetime discount on every purchase. To become a member, customers need to complete the form with their personal details and pay a one-time fee of Rs. 700. This fee grants

them access to the exclusive membership services and discounts offered by the store. By comprehensively covering these key elements, the "About Us" page aims to provide a thorough introduction to the online grocery store, its values, team, customer testimonials, and membership program, ultimately fostering trust and encouraging visitors to explore the service further.

3.5.2 Output of About Us Page

We provide best, fresh and organic food for our customers ensuring the best quality in reasonable price. We directly are in link with our local farmers who grow organic produce and raise animals humanely. We bring you the best while doing what is right for our global community. Our every product are organic and freshly-picked by our local farmers. We are dedicated to providing top-quality organic produce, meats, and other products that not only taste great but also leads to healthier lifestyle you are looking for.

[Shop Now](#)

Figure 24: output of about us page

We started this journey from tiny wooden table having our united dream of sourcing healthy and organic food to our community. Not only sourcing the organic products but also helping our local farmers who are the true experts of producing these organic and freshly hand-picked foods. We directly partnered with our local farmers and started from very small office in a wooden table where we four worked together having vision to bring freshest and healthiest food to our community.

In 2022, we implemented this vision when the world was suffering from pandemic disease COVID-19. At that time not only people were suffering from disease and shortages, but also were deprived financially. Then after, we planned this small start-up of helping local farmers and invested our savings and sold our organic products at reasonable price with top-quality. Our journey took turns when we started to get fame and good reviews from our community and we grew high and more. And then we planned for opening our pop-up store converting from tables to counters, small laptops to cashier tables and tiny baskets to shopping-carts. Finally at the end of 2023, we opened our first pop-up store in Kathmandu and named it "Kirana Station" and our first opening day we were overwhelmed of so many people visiting our very first own pop-up store.

We were only small dreamers who envisioned of doing something anew and helping our local farmers and providing our community with healthiest foods but never imagined we would grow this big. We are very grateful to our loyal customers who supported us since the beginning of our journey when we were just based online and till now. But our journey and vision doesn't end here, we are expanding more in near future and our aim is to open our franchise globally both e-store and physical store.

Figure 25: output of about us page (cont.)

The screenshot shows the 'Meet Our Team' section of the Kirana Station website. It features four team members in individual boxes: Aaditya Bhattarai, Pragun Maskey, Soumyata Shakya, and Aarati Dhakal. Each box includes a profile picture, name, and social media links (Facebook, Instagram, LinkedIn).

The screenshot shows the 'Testimonials' section of the Kirana Station website. It displays four testimonial cards for Sneha Sapkota, Pranjali Prasai, Kenshu Lama, and Renid Rai, each with a profile picture, name, star rating, and a brief testimonial.

Sneha Sapkota
★★★★★

A being a food lover, I absolutely love shopping with Kirana Station! Their wide selection, user-friendly website, and prompt delivery have made my grocery shopping experience so much easier and convenient.

Pranjali Prasai
★★★★★

I am literally so lazy to just get up and go to store for shopping but Kirana Station made this all so easier and I can just shop all of my essentials in just one click. I love how it is so much easier.

Kenshu Lama
★★★★★

Actually I am a office person and having time to for grocery shopping and have fresh food is really hard for me but thanks to Kirana Station I can have all of my grocery products in just few minutes and also I don't have to worry about the quality too. The quality with reasonable price they provide is really trustable.

Renid Rai
★★★★★

Finally, a good e-grocery store in city!! As a boy who is a student and also doesn't know much about grocery things and how to and what to buy?? Kirana Station made all of this so much easier. Best store ever and I recommend everyone to try from this store because their products are top-notch!!!

3.6 IN-DEVELOPMENT PAGE

The "Page in Development" functions as a temporary placeholder when users attempt to access features or sections that are currently being built and require backend coding for full functionality. This page appears when a user clicks on icons for their User Account, Wishlist, or Shopping Cart, which would typically direct them to the corresponding pages. The layout is straightforward, displaying a concise message to inform the user that the requested page is still undergoing development. The message reads, "Oops, the page you are looking for is still under development," clearly indicating that the desired feature is not yet available. To ensure a seamless experience, the page provides a convenient solution in the form of a prominently displayed anchor link labeled "Return to Home Page." This link allows users to easily navigate back to the website's home page, where they can continue exploring other available sections and features while the requested page is being developed.

By presenting this user-friendly page, Kirana Station aims to maintain transparency and manage user expectations while actively working on implementing the requested functionality behind the scenes. This approach ensures a smooth transition once the development process is complete, ultimately enhancing the overall user experience on the platform.

3.6.1 Output of In-development Page

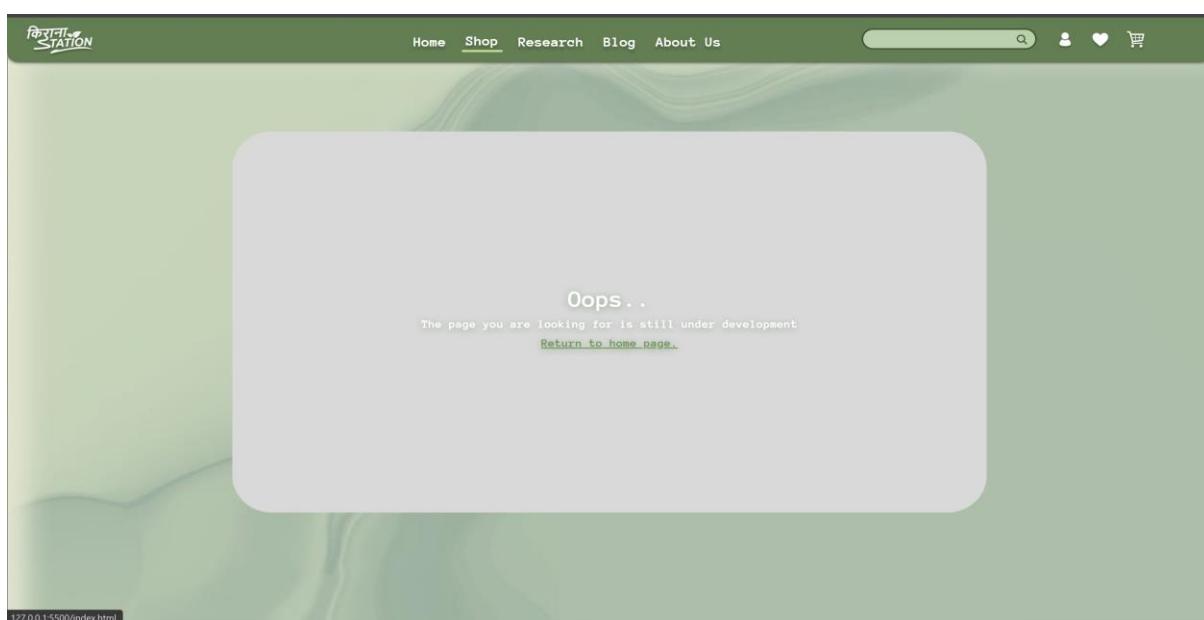

Figure 30: output of in-development page

4. Testing

4.1 Test 1: Checking the hover effect on navbar

Test No.:		1
Objective	Checking the hover effect on navbar	
Action	Hover the mouse cursor over any navbar link	
Expected result	The hovered link should change its color and decrease its font size.	
Actual Result	The hovered link should change its color and decreased its font size.	
Conclusion	Test was successful which means the 'a: hover' style in the CSS is working.	

Table 1: test1 to check hover effect on navbar

Figure 31: default navbar of home page

Figure 32: hover effect on navbar

4.2 Test 2: Change of icons and display of notification bar in flash sale section

Test No.:	2
Objective	Change of icons and display of notification bar in flash sale section
Action	<p>1.Click on the heart shape icon</p> <p>2.Click on the heart shape button again to unfavorite</p> <p>3.Click on the cart icon</p> <p>4.Click on the cart icon again to remove</p>
Expected result	<p>1.Hollow heart shape icon turns to red filled heart icon with a message “Added to favorites”</p> <p>2.Red heart shape icon turns back to hollow heart icon with a message “Removed from favorites”</p> <p>3.Plus cart icon turns to down arrow cart icon with a message “Added to cart”</p> <p>4.down arrow cart icon turns to plus cart icon with a message “removed from cart”</p>
Actual Result	<p>1.Hollow heart shape icon turned to red filled heart icon with a message “Added to favorites”</p> <p>2.Red heart shape icon turned back to hollow heart icon with a message “Removed from favorites”</p> <p>3.Plus cart icon turned to down arrow cart icon with a message “Added to cart”</p> <p>4.down arrow cart icon turned to plus cart icon with a message “removed from cart”</p>
Conclusion	Test was successful which means the 'java script to toggle class is working and the function is being called when it was clicked.

Table 2: test 2 to toggle icon's class

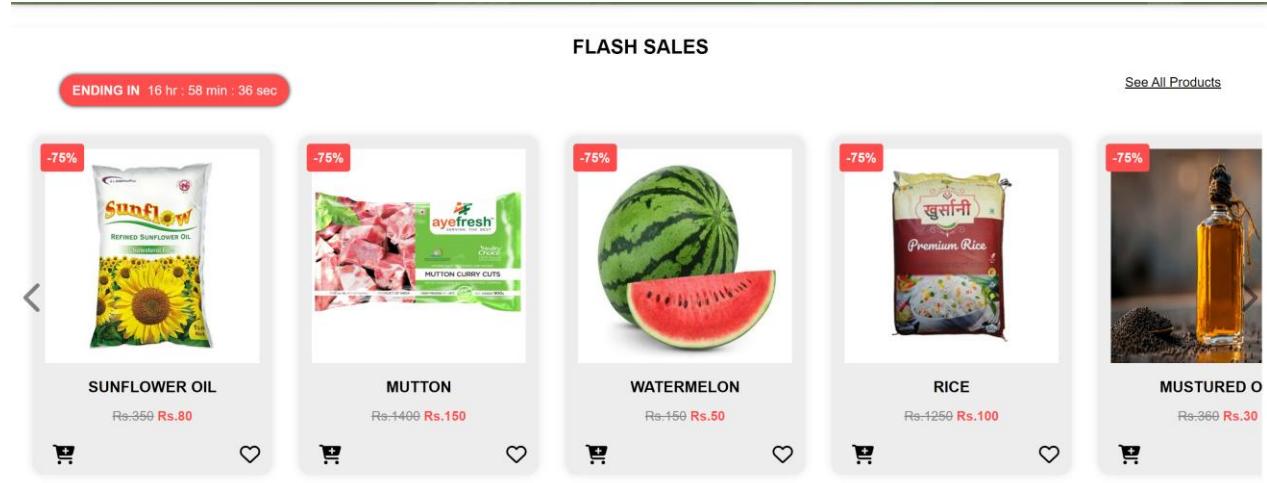

Figure 33: default flash sale section

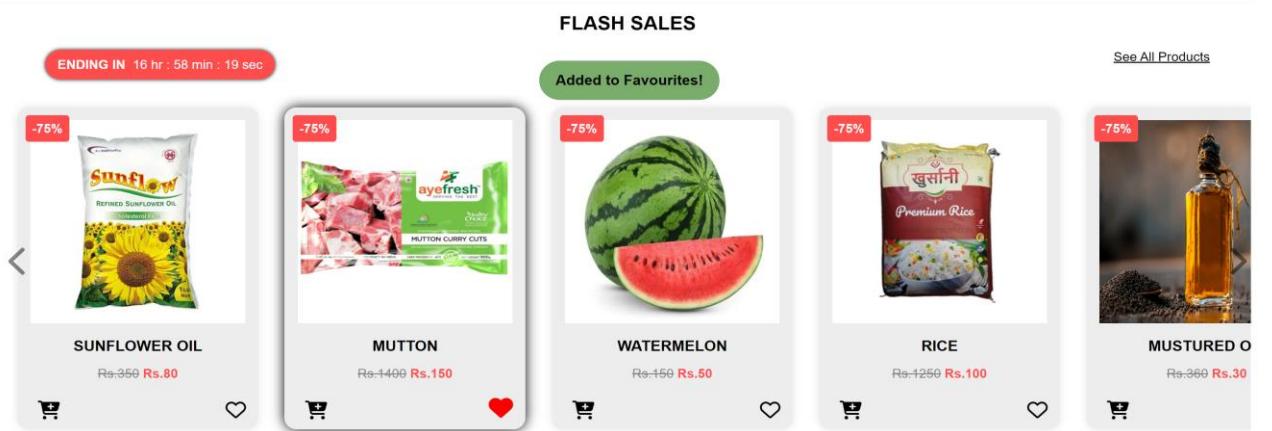

Figure 34: on clicking heart icon

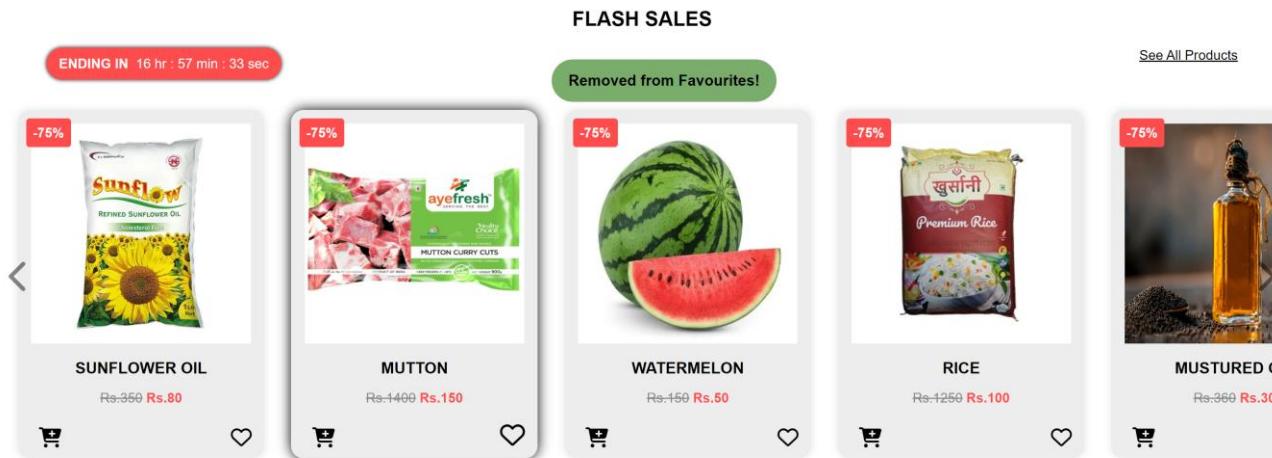

Figure 35: onclick remove from favorites

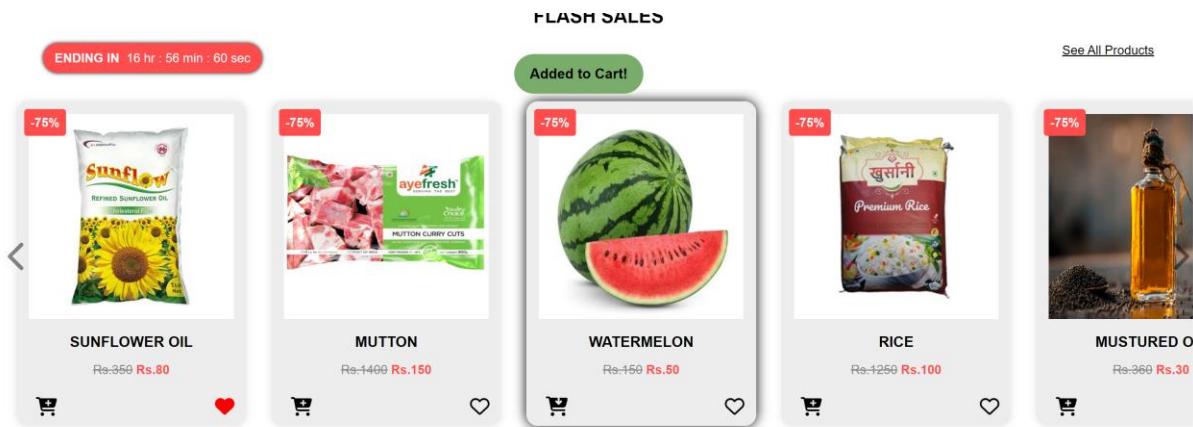

Figure 36: onclick add to cart

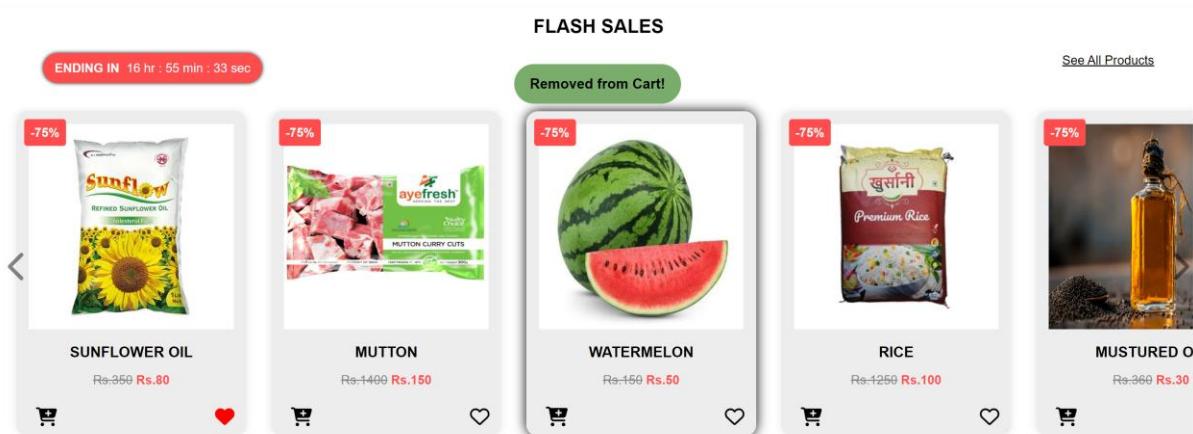

Figure 37: onclick remove from cart

4.3 Test 3: Internal link testing

Test No.:	3
Objective	Internal link testing
Action	Click on “Dive into Articles>>” button in the home page
Expected result	A hover effect should appear before clicking. After clicking the button, the page is redirected to articles of blog page.
Actual Result	A hover effect should appear before clicking the button. After clicking the button, the page was redirected to articles of blog page.
Conclusion	Test was successful which means the button was correctly internally linked which redirected the page to blog page(blog.html) from home page(index.html).

Table 3: test 3 to test internal links

The screenshot shows the KiranaStation website. At the top, there's a navigation bar with links for Home, Shop, Research, Blog, About Us, and a search bar. Below the navigation, a green header section features the text "What is KiranaStation?". Underneath this, there's a paragraph about the company's mission to bring fresh produce from the farm to the doorstep. A "Learn More >>" link is present. To the right of this, another section titled "Meet Our Team & Experience" describes the team behind the company. At the bottom left, there's a sidebar with a button labeled "Dive into Articles >>". At the very bottom of the page, there's a note asking if you want to know how they built the website, with a link to "Click here".

Figure 38: default description section

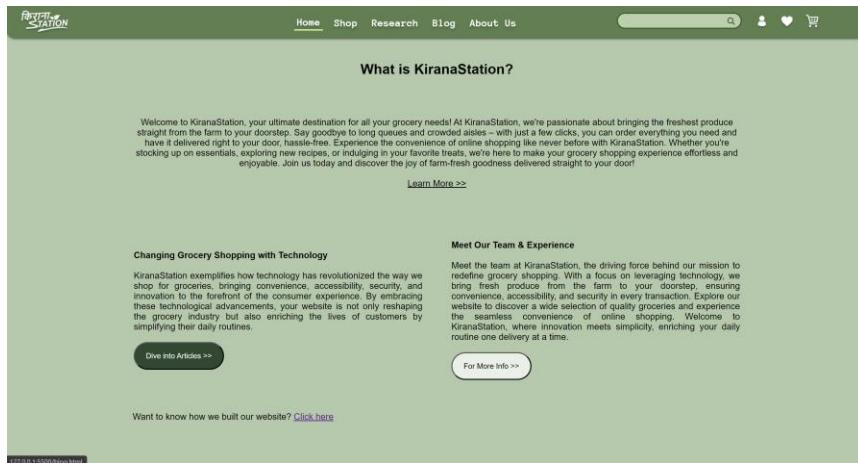

Figure 39: clicking dive into articles button

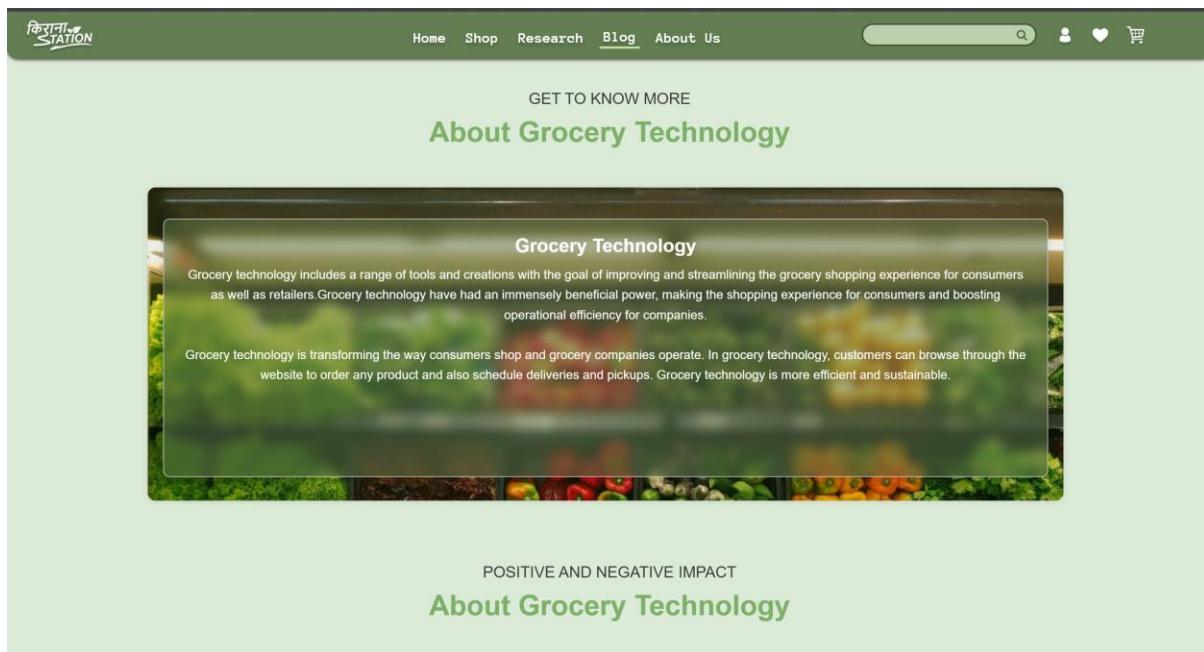

Figure 40: redirected to blog page from home page

4.4 Test 4: External link testing

Test No.:		4
Objective	External link testing	
Action	Click on “About BR” button in the 3 rd slider of the home page.	
Expected result	On clicking the button, the page is redirected to an external page of Baskin and robins about us web page.	
Actual Result	After clicking the button, the page was redirected to an external page of Baskin and robins about us web page.	
Conclusion	Test was successful which means the button was correctly externally linked which redirected the page to Baskin and Robins about us page from home page(index.html).	

Table 4: Test 4 for external link testing

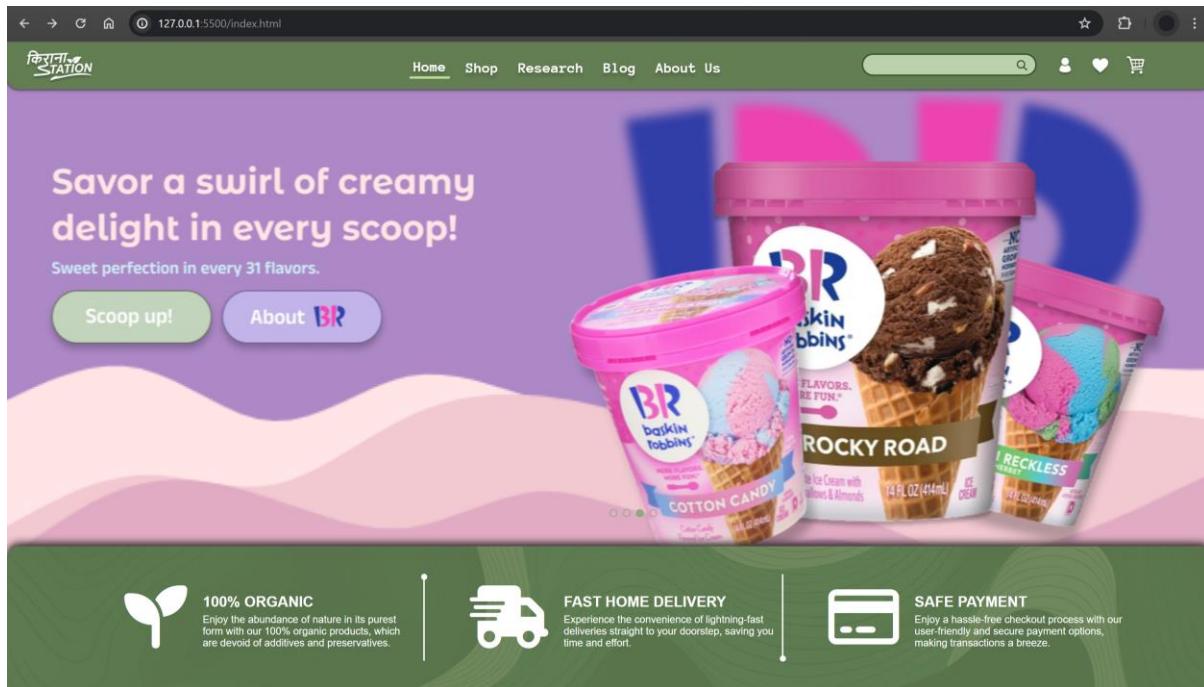

Figure 41: Clicking 'About BR' button

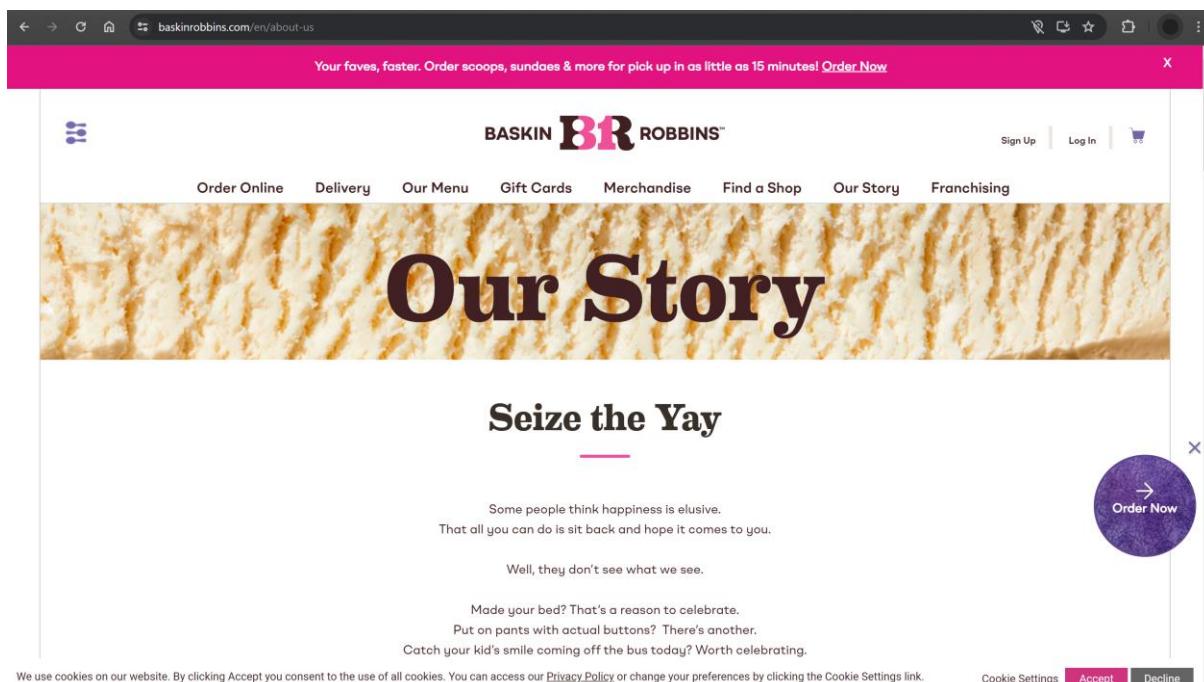

Figure 42: redirected to Baskin and robins about us page

4.5 Test 5: Setting quantity of products in product page

Test No.:		5
Objective	Setting quantity of products to add in cart and check minimum amount and maximum amount	
Action	1.Click on minus button when the quantity is set to 1 click on ok 2.Click on + button after quantity is set to 8 → click on ok 3.Click on add to cart	
Expected result	1. A pop-up message should be displayed when the quantity is tried to set less than 1 2.Another pop-up message should be displayed when the quantity is set above 8 3.A pop-up will appear with a message “your item has been successfully added to cart!”	
Actual Result	1. A pop-up message was displayed when the quantity is tried to set less than 1 2.Another pop-up message was displayed when the quantity is set above 8 3.A pop-up will appear with a message “your item has been successfully added to cart!”	
Conclusion	Test was successful which means that users cannot select fewer than 1 item and cannot add more than 8 items and will notify the customer when the item is added to the cart.	

Table 5: Test 5 for Quantity allowance and add to cart checking

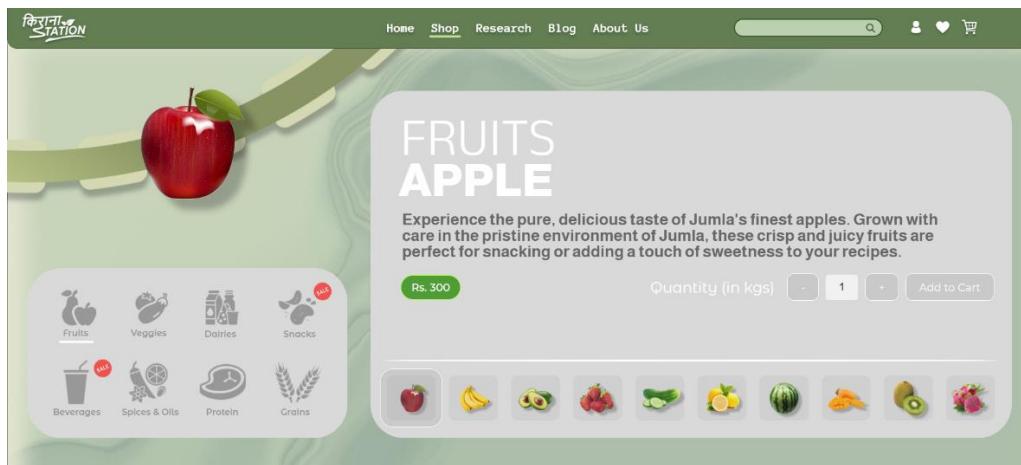

Figure 43: default product page

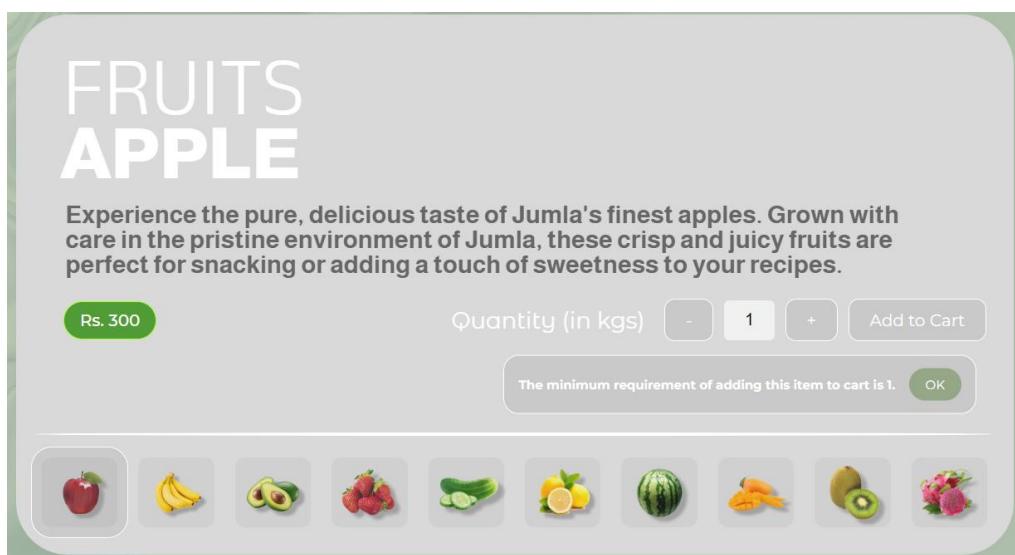

Figure 44: minimum quantity requirement

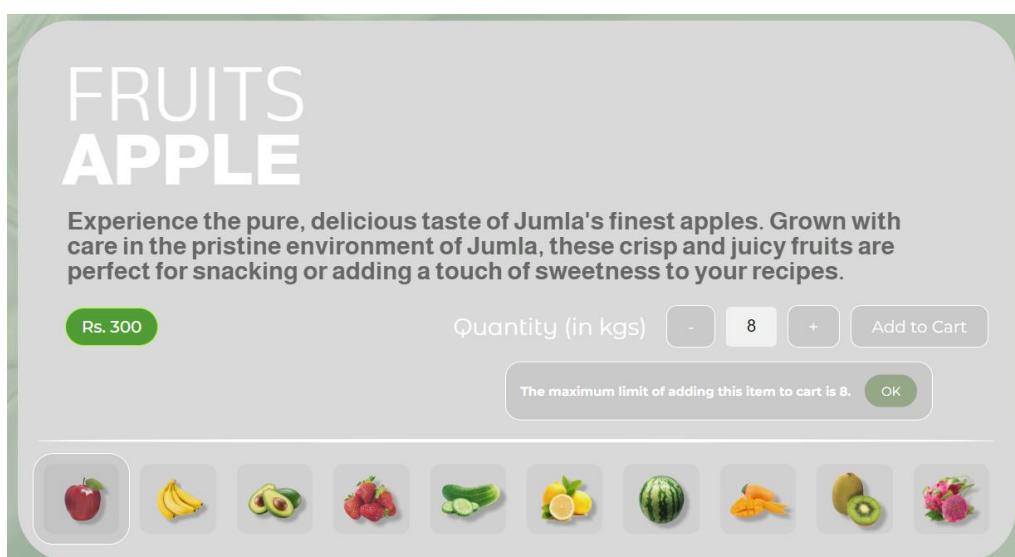

Figure 45: maximum quantity available

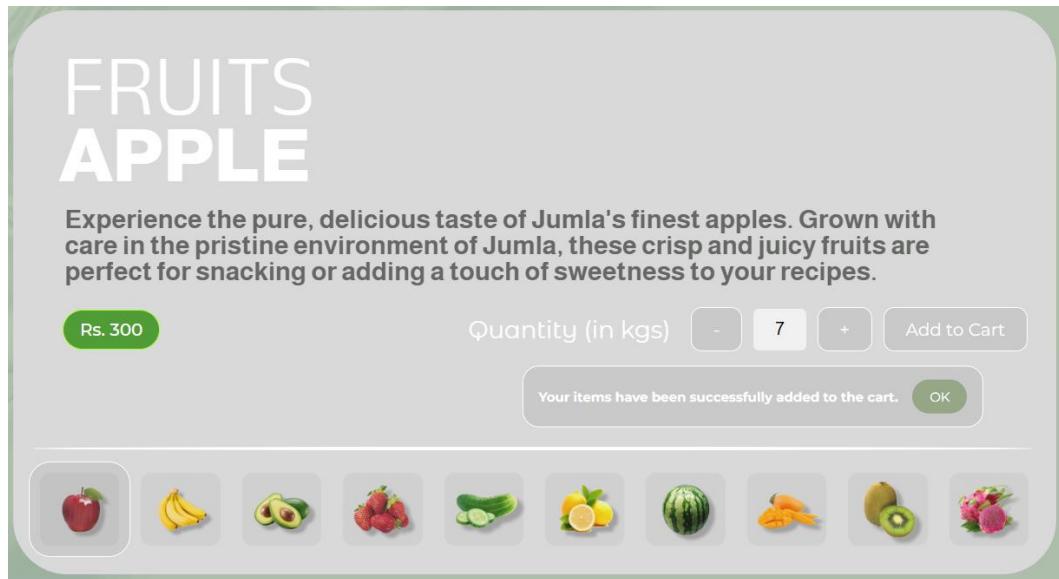

Figure 46: Add to cart function

4.6 Test 6: Pop up box on submission of membership form successfully

Test No.:		6
Objective	Pop up box on submission of membership form successfully	
Action	1.Fill all required inputs in the form 2.Click on join us button	
Expected result	1. A pop-up box should be displayed with a message "congratulations! You are our store's loyal member."	
Actual Result	1. A pop-up box was displayed with a message "congratulations! You are our store's loyal member."	
Conclusion	Test was successful which means that all the required input area was filled correctly and when the join us button was clicked, it ran the JavaScript code and displayed the alert box.

5. Conclusion

The aim of the project was successfully met by developing a fully functional website that incorporates all the features outlined in the coursework. Our website, named Kirana Station, consists of five key pages: Home, About Us, Shop, Blog, and Research. The Home page features a Header with our Kirana Station Logo, a navigation bar, various icons, and highlights all the flash sales. The Shop page provides detailed descriptions of products, including names and price information. The Blog page offers insights into grocery technology, discussing its positive and negative impacts. The About Us page contains a membership form for customers and showcases the profiles of each team member, while the Research page presents a comparison of our website with other similar platforms.

For the project, we utilized HTML5 to structure the website and CSS3 to style it, ensuring a visually appealing and user-friendly interface. Our approach included the use of external, internal, and inline CSS to manage the design efficiently. Additionally, we implemented JavaScript to add interactive elements such as a timer, toggle features, and other dynamic components that enhance user experience. All HTML files, images, and CSS stylesheets were meticulously organized and named for ease of access and maintainability. The project was informed by references from various websites, which guided our design and development process.

Through this coursework, we gained substantial knowledge and hands-on experience in website development and coding. The effective use of HTML tags, CSS styling, and JavaScript functionality was pivotal in achieving our project goals. This endeavor not only helped us understand the intricacies of building a fully functional website but also allowed us to showcase our technical skills. The completion of this project has significantly enriched our understanding of web development and provided us with a solid foundation for future projects.

the goal of improving and streamlining the grocery shopping experience for consumers as well as retailers. Grocery technology have had an immensely beneficial power, making the shopping experience for consumers and boosting operational efficiency for companies.

Grocery technology is transforming the way consumers shop and grocery companies operate. In grocery technology, customers can browse through the website to order any product and also schedule deliveries and pickups. Grocery technology is more efficient and sustainable.

<h4>Positive Impact Of Technology In Grocery</h4>

<p>

The introduction of technology in the grocery business drastically enhanced the shopping experience, efficiency, and convenience for consumers as well as businesses. Grocers may now maintain abundant stock levels with innovative inventory management systems and data analytics, decreasing waste and increasing product availability. Customers can purchase from the comfort of their own homes, schedule deliveries, and take advantage of tailored services through e-commerce and mobile applications. Furthermore, advancements such as self-checkout systems, automated warehouses, and AI-driven assistance for customers have simplified processes, dropped costs, and reduced human error, leading to a more sustainable and customer-centric retail organization.

<h4>Negative Impact Of Technology In Grocery</h4>

<p>

While technology has revolutionized the grocery industry, it also brings several negative impacts. The increased reliance

on automation and digital systems can lead to job displacement, reducing employment opportunities for cashiers, stock clerks, and other grocery store workers. Small, independent grocers may struggle to compete with larger chains that can afford the latest technological advancements, potentially leading to reduced market diversity. Additionally, the collection and use of consumer data for personalized marketing and inventory management raise privacy concerns, as customers may not always be aware of how their information is being used. Lastly, the digital divide means that some consumers, particularly the elderly or those in low-income areas, may find it challenging to adapt to online shopping platforms and self-checkout systems, exacerbating inequality in access to essential services.

    <h4>Conclusion</h4>
    <p>
      In conclusion, while grocery technology offers various benefits such as convenience, efficiency, and improved customer service, it also offers issues such as work displacement, privacy concerns, and higher levels of inequality. As result,
```

individuals in the grocery industry must carefully analyze and manage these issues to ensure that technological improvements benefit both customers and businesses while limiting negative social consequences.

            <p class="p2">
```

We started this journey from tiny wooden table having our united dream of sourcing healthy and organic food to our community. Not only sourcing the organic products but also helping our local farmers who are the true experts of producing these organic and freshly hand-picked foods. We directly partnered with our local farmers and started from very small office in a wooden table where we four worked together having vision to bring freshest and healthiest food to our community.

In 2022, we implemented this vision when the world was suffering from pandemic disease COVID-19. At that time not only people were suffering from disease and shortages, but also were deprived financially. Then after, we planned this small start-up of helping local farmers and invested our savings and sold our organic products at reasonable price with top-quality. Our journey took turns when we started to get fame and good reviews from our community and we grew high and more. And then we planned for opening our pop-up store converting from tables to counters, small laptops to cashier tables and tiny baskets to shopping-carts. Finally at the end of 2023, we opened our first pop-up store in Kathmandu and named it "Kirana Station" and our first opening day we were overwhelmed of so many people visiting our very first own pop-up store.

We were only small dreamers who envisioned of doing something anew and helping our local farmers and providing our community with healthiest foods but never imagined we would grow this big. We are very grateful to our loyal customers who supported us since the beginning of our journey when we were just based online and till now.

But our journey and vision doesn't end here, we are expanding more in near future and our aim is to open our franchise globally both e-store and physical store.

</p>
</td>

Actually I am a office person and having time to for grocery shopping and have fresh food is really hard for me but thanks to Kirana Station I can have all of my grocery products in just few minutes and also I don't have to worry about the quality too. The quality with reasonable price they provide is really trustable.

<p>
    Finally, a good e-grocery store in city!! As a boy who is a student and also
    doesn't know much about grocery things and how to and what to buy?? Kirana
    Station made all of this so much easier. Best store ever and I recommend everyone
    to try from this store because their products are top-notch!!!
</p>
